

# Photoplace of interesting - PhOfInt

13.04.2018

Andrey Logvinenko

## Overview

PhOfInt - the Photography application maintain a list of scenic photo locations around some city.

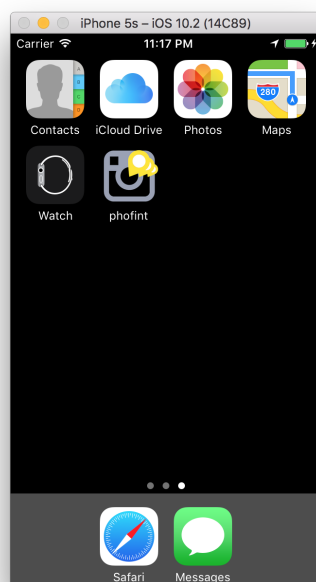

## Goals

1. To give people a photo opportunity when they live a full life.
2. Give users a convenient service on search of interesting places for photos.
3. To make users happy.

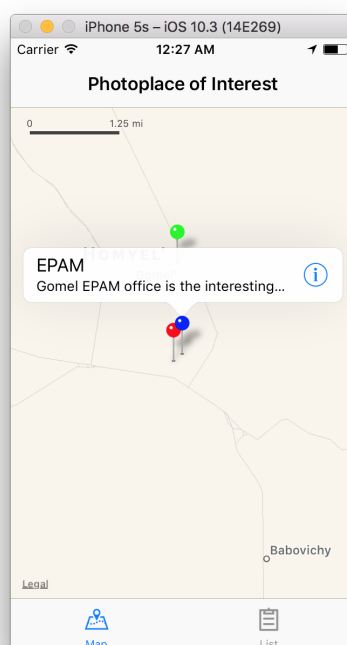

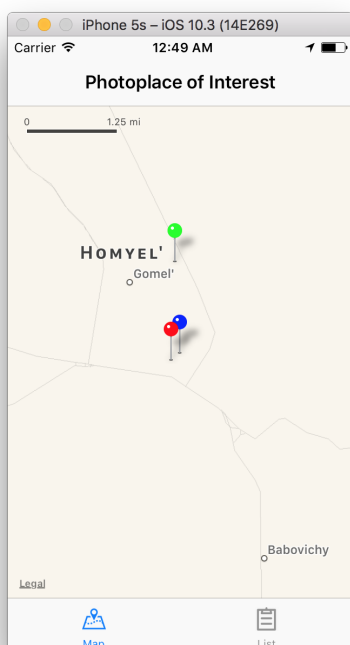

## Specifications

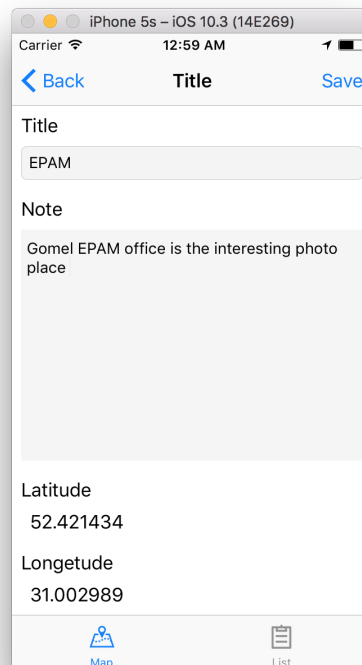

To run the application you must press the icon

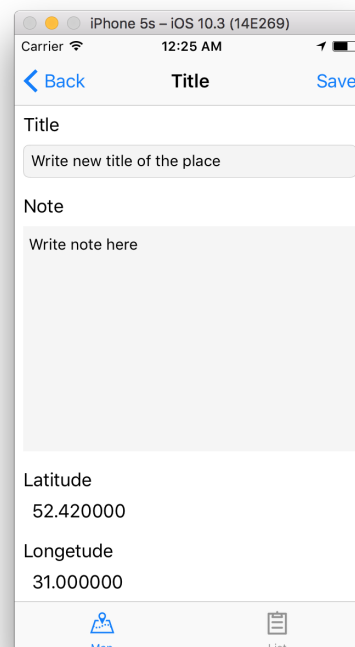

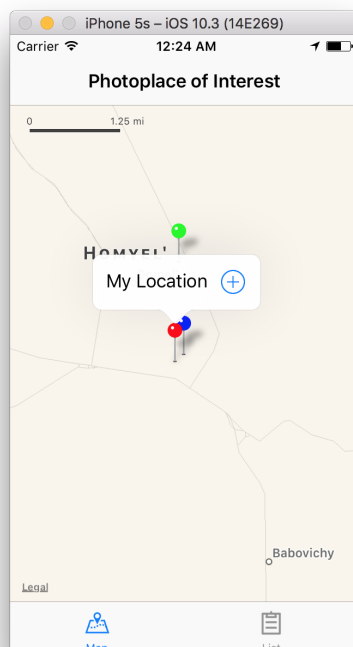

Then you will be able to see all the interesting places around you. Green pins mark the places you have saved yourself. Red pin shows your current location. To get more information you must click on the icon (i).

You can add more information in the section “Note”. The changes should be save by clicking “Save”.

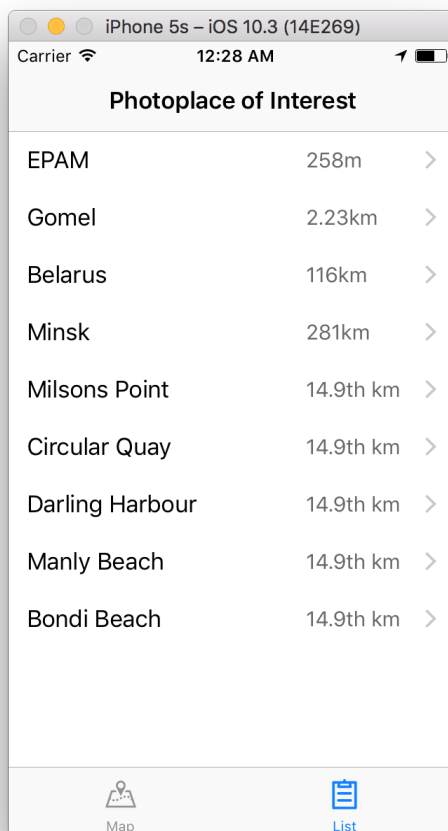

You can use two ways to add new points. To add points you must perform a long tap in the required location. Add point to user location is much easier - you need to click on the icon (+).

Section “List” it displays the distance from you are interested in the points. If you are interested in something, you can choose the appropriate item, and immediately relocate on the map at point of interest.

When you move the distance will be recalculated in real time.

Wish you good photos.
